From the Superintendent

March is here and opening day of our season's Golf activities is little more than a month away. Our concerns are again concentrated on promoting fast, healthy green-up, especially on the greens.

In an effort to achieve this, last spring we purchased three greens covers and spread them over numbers 7, 12 and 18. The covers are designed to permit air and water circulation while preventing dessication and keeping soil temperatures several degrees warmer than surrounding areas. The results were definitely noticeable. The covered areas showed stimulated growth in both root and leaf systems. They also showed early germination of existing Poa Annua seeds as well as newly spread Bent grass seeds: a significant factor. A large percentage of the greens infested with the Poa Annual type of grass must recover from new seed germination.

These positive results prompted us to purchase six additional covers which will allow us to cover nine greens at one time. We are confident that the use of these covers during the months of March and April will give us a two to three week head start on getting the Golf Course into good playing condition.

Lost and Found

Since our last notice in October's Georgian, a large number of personal belongings have been collecting in our Lost and Found. These items range from shoes to brooms — so if you have misplaced anything, please feel free to check at the Front Office.

From the Ice Maker

"Ice Cleaning"

Ice maintenance is an important part of Curling. We use the Pro Oxy Melter to resurface and clean our ice. Resurfacing by "deep-burning" is done first. The Pro Oxy Melter is automatically drawn down the sheet from end to end at a speed of about three feet per minute or 45 minutes for each sheet of ice.

This operation simulates flooding by melting the ice to allow 1/16 inch of water to seek its own level. The dirt particles from brooms, shoes, etc., float and freeze on the ice surface which can be removed by cleaning.

Cleaning is done by again pulling the burner down the sheet but this time at a speed of about 10 feet per minute or 15 minutes for each sheet of ice. This melts a very thin thickness of ice and loosens any dirt particles on the surface. This dirty water is then squeezed to one side of the ice where it is vacuumed up by a water vacuum leaving a level clean sheet of ice behind. The ice is then scraped and pebbled. The rocks are set down on thin wooden strips which allows the rocks to cool without melting onto the ice and after an hour or so the ice is ready for play.

Deep burning is done once every two weeks, the new building one week and the Annex the following week. I hope this will give you an idea of how your ice is maintained.

Little Kelly Cup Bonspiel

The Little Kelly Cup Commercial Bonspiel was held on February 20 and 21 with 30 rinks taking part. A delicious banquet was served by the Club on Saturday evening.

The Little Kelly Cup was won by Colin Cale and his rink of Kevin Cale, Tim Cawdell and Marg Cooper. Alex Dunbar, Marlene Jones, Dave Jones and Joan Dunbar were second.

The Van Horlick "B" Event Trophy had Gary Hannam, Heather Hannam, Francis Zingle and Clarence Richard winning over Frank Townsley, Nelda McInnis, Ian McInnis, and Jackie Townsley.

The "C" Event which used to be sponsored by W.M. Tire has now been changed to the Kal Tire Trophy. It was won by Bob Copeland, Rick Debelser, Rae Copeland and Barb Copeland. Maisie Minchin's rink of Lynda Peter, Bruce Minchin and Gerry Stiles was runner-up. Everyone seemed to enjoy themselves.

I would like to thank all those businesses who donated prizes. The co-operation and assistance of these businesses is really appreciated.
